

Rebecca Clark, BS; Student Tulane School of Medicine

Rebecca is currently in her first year at Tulane University's School of Medicine where she also volunteers as a Basic Life Support certification instructor. She completed her B.S. degree at Mills College with a major in Biopsychology. She has worked as an Emergency Medical Technician for a private ambulance company between 2004 and 2006. She was recently a Research Associate for California's Alameda County Emergency Medical Services. There she co-managed several research projects including a study to determine the optimal age group for disseminating CPR skills to the community. Additionally, she performed studies assessing the safety of pre-hospital interventions of airway devices. Rebecca also performed quality improvement projects, one of which was developing a pre-hospital airway management "checklist" which is currently being used in a pilot quality improvement program in Alameda County. Her current medical academic interests are Emergency Medicine and Pediatric Cardiology.
